The Key theme of the book (best friends) is friendship. I think this because one friend gets separated and they have to get together again.

Dear Blitzcat,
Hello. I guess you must like Stalker's lunch, because you ate all of it up! How did are you know? Why didn't you like the crying sound of the baby's and toddlers? I think you did like your ounces though, don't you? How come you're not afraid of the horrible sounds of the big bombs and the scary crashes? The rabbits must be very fast to get away from you. The war back then was big and dreadful. I bet you didn't like it! Who was your "real owner"? Well, it must have been exiting and scary.
Lots of love from Maddie

PROJECT PANDA!
Giant pandas live high up in the mountains of the Sichuan, Gansu and Shaanxi provinces in China.
Bamboo
There are 700 kinds of bamboo but the panda presers only 2. The arrow and the umbrella.
Some scientists belive that the red pandas is the giant pandas closest relative.
How does a panda eat
A panda eats bamboo by pushing the stem into the corner of its mouth and taking several quick bites while jerking the stem up and down to break it.
Newborn pandas are pink and hairless. They are about 15cm long and weigh 100-150g. In a month they have the sairiliar black and white markings.
